Solution Overview

Please fill with high-level overview of the end-to-end solution describing the key components of the solution, how they are integrated, the data sources/repositories, and how the users will interact with the solution. Normally presented in a diagram. Subsequent sections describe the solution overview.

Functional & Technical Design

Design <*User Story 1 Name*>

Items	Description
User Story	*Please fill the user story description*
Functional	1. Process Flow *Please describe/draw the process flow design* 1. System Interface *Please describe the system interfacing design* 1. Screen Description *Please describe/draw the screen design* 1. Report Description and Layout

	Please describe/draw reporting design
Technical	1. Impact in Online – day mode (if applicable) *~Day mode is transaction that is executed outside SIBS critical batch process (Zone 1, 2 and 4)* a. Programs/Modules impacted *List down all the online programs/modules impacted by this customization and describe the impact/changes.* a. Databases impacted *List down all the databases, their tables/fields impacted by this customization and describe the impact/changes including reference to ER diagram as appendices.* b. Screens impacted *List down all the screen names and fields impacted by this customization and describe the impact/changes.* 1. Impact in Online – night mode (if applicable) *~Night mode is transaction that is executed in SIBS critical batch process (Zone 3)* a. Programs/Modules impacted *List down all the online programs/modules impacted by this customization and describe the impact/changes.* c. Databases impacted *List down all the databases, their tables/fields impacted by this customization and describe the impact/changes including reference to ER diagram as appendices.* d. Screens impacted *List down all the screen names and fields impacted by this customization and describe the impact/changes.* 1. Impact in Batch (if applicable) a. Programs/Modules impacted *List down all the batch programs/modules impacted by this customization and describe the impact/changes.* e. Databases impacted *List down all the databases, their tables/fields impacted by this customization and describe the impact/changes including reference to ER diagram as appendices.* f. Screens impacted *List down all the batch jobs/scripts impacted by this customization and describe the impact/changes.* 1. Impact in Interface (if applicable) *List down all the batch/online interfaces impacted by this customization and use diagram to illustrate the interfaces.* 1. Impact in Report (if applicable)

	List down all the report names and fields impacted by this customization and describe the impact/changes

Design <*User Story 2 Name*>

Items	Description
User Story	*Please fill the user story description*
Functional	1. Process Flow *Please describe/draw the process flow design* 1. System Interface *Please describe the system interfacing design* 1. Screen Description *Please describe/draw the screen design* 1. Report Description and Layout *Please describe/draw reporting design*
Technical	1. Impact in Online – day mode (if applicable) a. Programs/Modules impacted *List down all the online programs/modules impacted by this customization and describe the impact/changes.* a. Databases impacted *List down all the databases, their tables/fields impacted by this customization and describe the impact/changes including reference to ER diagram as appendices.* b. Screens impacted *List down all the screen names and fields impacted by this customization and describe the impact/changes.* 1. Impact in Online – night mode (if applicable) a. Programs/Modules impacted *List down all the online programs/modules impacted by this customization and describe the impact/changes.* c. Design <*User Story 3 Name*>

Items	**Description**
User Story	*Please fill the user story description*
Functional	1. Process Flow *Please describe/draw the process flow design* 1. System Interface *Please describe the system interfacing design* 1. Screen Description *Please describe/draw the screen design* 1. Report Description and Layout *Please describe/draw reporting design*
Technical	1. Impact in Online – day mode (if applicable) a. Programs/Modules impacted *List down all the online programs/modules impacted by this customization and describe the impact/changes.* a. Databases impacted *List down all the databases, their tables/fields impacted by this customization and describe the impact/changes including reference to ER diagram as appendices.* b. Screens impacted *List down all the screen names and fields impacted by this customization and describe the impact/changes.*

1. Impact in Online – night mode (if applicable)
    a. Programs/Modules impacted

List down all the online programs/modules impacted by this customization and describe the impact/changes.

    c. Databases impacted

List down all the databases, their tables/fields impacted by this customization and describe the impact/changes including reference to ER diagram as appendices.

    d. Screens impacted

List down all the screen names and fields impacted by this customization and describe the impact/changes.

1. Impact in Batch (if applicable)
    a. Programs/Modules impacted

List down all the batch programs/modules impacted by this customization and describe the impact/changes.

    e. Databases impacted

List down all the databases, their tables/fields impacted by this customization and describe the impact/changes including reference to ER diagram as appendices.

    f. Screens impacted

List down all the batch jobs/scripts impacted by this customization and describe the impact/changes.

1. Impact in Interface (if applicable)

List down all the batch/online interfaces impacted by this customization and use diagram to illustrate the interfaces.

1. Impact in Report (if applicable)

List down all the report names and fields impacted by this customization and describe the impact/changes

**Repeat this tables as needed*

Parameter Changes

1. **Utilize Existing Field?**

☐ YES ☐ No
If Yes, Impact Analyst
☐ Done ☐ Not Yet
Review impact Analysis by :

IT Application Development : [Name]
IT Business Analyst : [Name]

1. **Data Migration?**

☐ Yes ☐ No

Security and Control Design

Describe security and control consideration including security matrix for various functions, screens and etc.that can be performed by the different user groups; application; audit trails; transaction logs and their retention period.

Backup and Data Retention Design

List down the data that need to be backed-up, its type of backup, frequency, location and retention period
